

5. The licensee must ensure that after harvest of any industrial hemp all parts of a plant not being used for authorised activities are destroyed in an approved manner.
6. The licensee must make the following records within one day of each event to which the record relates and keep those records for a period of not less than two years from the date of the last entry;-
 - a) details pertaining to the receipt of seed, including date, source and quantity;
 - b) details pertaining to planting, including the quantity of seed used, location on the authorised premises, area planted and the quantity of seed remaining;
 - c) results and certificates of all analysis;
 - d) removal of any plant material from the authorised premises;
 - e) details of any unauthorised destruction or removal of, or interference with, any seed or plant or the land or its surroundings; and
 - f) details of the amount of industrial hemp harvested and the manner in which it was, or is to be processed or dealt with. This is known as a harvest report.
7. The licensee must provide a copy of each record to the Registrar or an inspector on request.
8. The licensee must allow an inspector to exercise the inspection powers conferred by the Act.
9. The licensee must maintain a record of visitors to the authorised premises including details of the name of the visitor and the date and purpose of the visit. The record shall be kept for two years and shall be made available on request to the Registrar or an inspector.
10. The licensee must immediately inform a Police Officer and the Registrar of any theft, loss or unauthorised destruction or other dealing with industrial hemp or industrial hemp seed covered by this licence and of any attempted interference with the authorised activities.
11. The licensee must provide a harvest report to the Registrar within one week of harvest.
